

# Smart · Secure · Complete

Our hospital  
has joined the  
**Ontario  
Laboratories  
Information  
System (OLIS)**

The Ontario Laboratories Information System enables hospitals, community laboratories, public health labs and physicians to securely exchange lab test results.

There are many benefits:

- Timely and complete up-to-date lab information for your care team
- Less duplication of lab tests
- Fewer gaps in patient information between the hospital and your family physician

If you wish to restrict access to your information on OLIS, please contact Service Ontario at 1-800-291-1405 (TTY 1-800-387-5559)
